

Repealing Net Neutrality will hurt American small businesses and stifle internet access for Americans who are living in poverty as well as in rural communities. It will allow corporations to decide winners and losers, instead of allowing the market to decide. Below is an example from Portugal which clearly gives us a good idea of what our internet service providers will be able to do if Net Neutrality fades away. This truly hurts small businesses and consumers which, as I have heard from many politicians in both the House and Congress “are the backbone of our country”. Repealing Net Neutrality will hurt America, and that is why I am registering this complaint. Thank you.”
